

## About: Drover Foods

Drover Foods is an Irish family-owned business, established 40 years ago. At the start of their long journey, the company started making raw frozen sausages for the retail market in Ireland. Today, they make very few raw products and have evolved into a ready-to-eat food ingredients manufacturer servicing the European B2B market. Currently, their largest area of growth is in the sale of vegetarian products, e.g. falafels, bhajis, fritters, veggie sausages and meatless meatballs. At Drover Foods they develop fresh new ways to bring the latest food trends to the convenience market.

They combine their scientific expertise with a natural curiosity and love of food to create premium food ingredients that excite and inspire.

The world of food and flavour never stands still, which is why at Drover Foods they don't either. From developing trends to brand new flavour profiles or the latest street food must haves, they are on a constant journey to discover it all. It's an obsession that comes naturally - straight from their love of food, genuine curiosity and passion for the industry!

## Location: Wexford, Ireland

## Products:

**Falafel:** Drover's succulent Falafel was developed by Jabba, their Lebanese chef to an authentic recipe. The falafels are gluten free and are available in a variety of unit weights, shapes and flavours. One of the most popular falafels is the Super Green Falafel, which contains spinach, broad beans, peas and courgettes. Other popular varieties include Carrot and Coriander, Beetroot, Pumpkin and Chilli, Spinach and Pine Nut and a very special Christmas Festive falafel.

**Potato Rösti & Onion Bahj:** Drover's Onion Bhajis were developed by the Indian Chef Manjo. The authentic recipe and spices have resulted in a delicious bhaji that will make you want more! The Potato Rösti are crispy, tasty and incredibly addictive. Crunchy and golden on the outside, they're just as good on the inside - deliciously tender Maris Piper potato, cooked to perfection.

**Veggie Sausage and Meatless Meatballs:** Veggie sausages and meatballs are the newest products and are available fully cooked. They are so good, you wouldn't know they don't contain meat. The unique recipe is based on seitan and delivers a succulent sausage/meatball flavour and texture.

**Sausages & Stuffings:** The original heart of Drover's business, cooked sausages. The sausages and stuffings are used as an ingredient in prepacked sandwiches throughout the UK. If you have a prepacked chicken and stuffing sandwich in the UK, its most likely Drover have made the stuffing. Like all other products, each recipe is bespoke and tailor-made to their customers' specifications. Drover don't work from a product list, they work with their customers to give them what they want. This is the fundamental principle by which they operate.
